#### **DETAILED ACTION**

## Specification

1. The disclosure is objected to because of the following informalities: Update pending applications referenced such as on page 21. The use of trademarks should be capitalized. Note page 15.

Appropriate correction is required.

## Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1,2 and 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite in the term S and D. Both terms need to be related to the carrier and its solvated or dispersed state.

Claim 2 is indefinite in the term "visual enhancement additive" the only type is a pigment particle.

Claims 4-6 teach the Tg but on page 21 the Tg is of at least 55°.

# Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baker et al in view of Elmasry et al and Jongewaard et al. Baker et al teaches a toner for a developer having an organsol in which the core polymer Col. 8 lines 20-Col. 9 line 25. can be a (methyl) methacrylate. Table 1 and 2 show the common monomers and their glass transition temperatures for the amphipathic copolymer. This is a core-shell type polymer binder for the toner. Elmasry et al teaches the core-shell polymer binder with multi-characteristics. The core or disperse phase Col. 7 line 35 can have the Tg from 25-105°. Jongewaard et al also shows the Tg as an important physical characteristic of the toner binder note Col. 8 lines 1-24. The grafted resin is formed by emulsion polymerization with the water-insoluble org. solvent removed. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the binders of Elmasry and Jongewaard as the binder in the toner composition as taught in Baker et al with the physical characteristics that are inherent in the polymers that differ along the polymeric backbone of the binders.

## Double Patenting

5. Claims 1-12 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of copending Application No. 10/612533 in view of Baker et al. This is a <u>provisional</u> obviousness-type double patenting rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John L Goodrow whose telephone number is 571-272-1384. The examiner can normally be reached on Monday -Friday.

Application/Control Number: 10/612,765

Art Unit: 1756

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark F Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
